## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 19-29 and 36, drawn to the method of marketing, classified in class 705, subclass 10.
- II. Claims 13-18 and 30-35, drawn to the article, classified in class 63, subclass 3.
- III. Claims 37-46, drawn to the method of making, classified in class 264, subclass 2.5.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to fabricate fishing lures.

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process of marketing the product as claimed can be practiced with hats, mugs, pennants and the like.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Seth Nehrbass on April 22, 2002 a provisional election was made without traverse to prosecute the invention of Group III, claims 37-46. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-36 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
